Saatvik Madan

saatvik-10 | saatvik-madan-9ab4a32a9 | saatvikmadan529@gmail.com | +919058945409

Skills

Languages	Java, JavaScript (ES6+), TypeScript, Python, Go, Rust
Backend & APIs	Node.js, Express.js, FastAPI, Hono, REST APIs, Prisma, SQLAlchemy
Frontend	React.js, React Native, Next.js, HTML5, CSS3, Tailwind CSS
Databases	PostgreSQL, MongoDB, pgvector, Hybrid Retrieval / Vector Search
Cloud & DevOps	AWS, Docker, Kubernetes, Nginx, Prometheus, Grafana, CI/CD, Git
Blockchain	Solana, Rust (smart contracts, PDA creation), on-chain testing

Work Experience

Infosys, Mysore (App Developer Intern) Apr 2026

- Built and shipped backend features for an enterprise-grade application as part of an Agile team.
- Worked across sprint cycles with app development teams to integrate features into the existing codebase.
- Delivered production-ready work within sprint timelines over the course of the internship.

Engineer's Cradle, Pune (Frontend Developer Intern) Sep 2024 - Jan 2025

- Planned and built RESTful web services to manage and surface dynamic datasets across the product.
- Led full redesigns of existing websites, improving navigation structure and on-page SEO.
- Built responsive UI with React and Tailwind CSS as part of a frontend modernization push.

Projects

RAD Android / iOS

Developed a cross-platform grocery shopping app featuring product discovery, cart synchronization, and order management, now live with 130+ users. Integrated Razorpay payments and Cloudflare R2 image storage, and implemented database migrations, order lifecycle management, and deployment workflows.

RAG Engine GitHub

Built a modular, production-grade Retrieval-Augmented Generation (RAG) engine from scratch for reliable document question answering, combining dense vector search (pgvector) with BM25 lexical search fused via Reciprocal Rank Fusion, followed by Cross-Encoder reranking, grounded generation with source citations, and query-level observability, using FastAPI, PostgreSQL (pgvector), SQLAlchemy, Sentence Transformers, PyMuPDF, and OpenRouter.

Better-Omegle Live / GitHub

Built a real-time, Omegle-style video chat application in React and TypeScript featuring instant matchmaking, private rooms, and live messaging, using WebRTC and Socket.io for peer connections and Redis to manage session and room state, containerized with Bun, Express, and Docker Compose for resilient, low-latency deployment.

Education

MIT World Peace University, Pune (CGPA: 8.66)
B.Tech Computer Science

Achievements

Research Paper (Accepted) | ***10th ICICC 2027 (Springer LNNS)*** Oct 2026

- Authored *"A Comparative Experimental Study of Deduplication, Differentially Private Training, and Machine Unlearning for Reducing Memorization and Privacy Leakage in Language Models."*

Odoo 2025 Hackathon Finalist Aug 2025
